EXPERIENCE

Insight 2021-2024
Software Engineer

Engaged in a variety of client projects, refining skills in Front-End development and contributing to Back-End tasks. Utilized technologies such as React.js, HTML/CSS, Tailwind CSS, Next.js, Node.js, and AWS. Demonstrated adaptability to rapidly meet client needs and commitment to continuous learning. Designed UI for a Generative AI Chat application using Next.js.

- Elevated proficiency in Front-End development with React and TypeScript, while broadening expertise to encompass Back-End tasks utilizing Node.js, AWS, and serverless technologies.
- Bridged the gap in back end development on a client project, seamlessly integrating front end and back end tasks to complete project requirements, thereby strengthening client relationships.

Momentum 2021
Software Developer

Achieved successful completion of immersive software development training over 16 weeks, specializing in refining skills in Python/Django, JavaScript, HTML, and CSS through hands-on, project-based learning. Engaged in solo, pair programming, and group projects daily and weekly to master contemporary development tools, methodologies, and industry best practices.

- Achieved high performance as the sole front end developer by spearheading the design and development of the UI/UX for an application using React and Material UI, resulting in a successful final project and paving the way for securing a consultant role.

Additional Experience: **_Manager's Assistant_** _at Enterprise Holdings (2017-2020),_ **_Legal Assistant_** _at Arrington & Phillips (2015), LLP, and_ **_Barista_** _at Starbucks (2010-2017)_

TECHNICAL SKILLS

- ❏ HTML/CSS
- ❏ React.js
- ❏ TypeScript
- ❏ JavaScript
- ❏ Material UI
- ❏ Python/Django
- ❏ Command Line
- ❏ GitHub
- ❏ Remote Software Dev.
- ❏ Agile Development
- ❏ JSON
- ❏ Node js
- ❏ AWS
- ❏ Tailwind

EDUCATION

Momentum, Durham, NC — _Software Development_

05/2021

Spent my time learning the core skills of full stack software development. Specializing in front-end development and working on group projects to apply new skills on a daily basis. Building applications with JavaScript/React while collaborating with a back-end team.

University of North Carolina at Charlotte — _English/Econ_
